JOHN WAYNE ISLAND

Only 3 km off the beach from Punta Chame lays the small and private island, which was once owned by the famous film actor John Wayne. In his honor, John Wayne City – a western-like resort and theme park were built which used to be a holiday destination for European and American tourists.

Today, the so-called 'John Wayne Island', is totally deserted and resembles a ghost town where nature is slowly taking over again.

The island is also known for its unique nature and birdlife. You might be able to find little monkeys, hummingbirds, goats, dogs, iguanas and a variety of nesting birds.
